

<b>Corporate Data</b>	
<b>Intana Bioscience GmbH</b> Lochhamer Str. 29a 82152 Planegg <a href="http://www.intana.de">www.intana.de</a> ; <a href="mailto:info@intana.de">info@intana.de</a> Dr. Stefan Hannus <a href="mailto:Stefan.Hannus@intana.de">Stefan.Hannus@intana.de</a>	
<b>Core Team and Responsibilities</b>	
Dr. Stefan Hannus; managing director Dr. Frank Becker, managing director	
<b>Technologies and Intellectual Properties</b>	
<p>Based on its proprietary fluorescence cross correlation spectroscopy (FCCS) Intana offers highly-specific biochemical profiling services for companies in the pharmaceutical, chemical and life science industries. Intana Bioscience employs FCCS - a single molecule sensitive technology - to characterize biomolecular interactions in solution. The approach is extremely well suited to determine affinities and rate constants of interactions between compounds, targets and off targets in cellular lysates. Thus, measurements are performed in a natural environment and costly production of purified protein targets can be avoided. So far, the technology has been successfully employed for customers from the pharmaceutical industry in their drug discovery and development efforts.</p>	
<b>Business Model, Market Strategies, Competitors</b>	
<p>Intana Bioscience offers specific interaction analysis and profiling services for companies in the pharmaceutical and chemical industries as well as biotech companies. Intana concentrates on research aspects which are currently only accessible with tremendous efforts. Especially, the sensitive kinetic analyses of drug-target interactions in cellular lysates, as well as the rapid development of specific assays for so far inaccessible target proteins are a core competence of Intana. Well-known pharma players are among Intana's current customers. Research and development activities are directed towards the development of the further development of Intana's proprietary technology into additional application fields.</p>	
<b>Current Status</b>	
<ul style="list-style-type: none"> <li>• Founded as spin-off from GPC Biotech AG/Germany in September 2008</li> <li>• Seed-financing in March 2009 through HTGF, Bayern Kapital and BioM AG.</li> <li>• Currently 6 employees.</li> <li>• Several customers from big pharma to biotech acquired.</li> </ul>	
<b>Offers and Requests</b>	
<ul style="list-style-type: none"> <li>• Provision of services in drug discovery projects.</li> </ul>
